

AI WORKERS

Digital Employees for Your Business

Delegate repetitive tasks to AI and focus on strategic growth.
Automate operations, marketing, sales — save up to €24,000/year.

WHAT IS AN AI WORKER?

Imagine a workforce that never takes breaks, never makes mistakes, and operates 24/7 without added HR expenses. AI Workers are digital employees designed to handle essential business processes with precision and efficiency, saving companies up to **€24,000** per year per employee.

AI Workers eliminate the need for recruitment, onboarding, and human errors, ensuring seamless operations at a fraction of the cost of traditional employees.

WHAT CAN BE AUTOMATED?

AI Workers can take over various business roles, optimizing workflows and increasing productivity.

Key automation areas include:

.

✓ Sales process

Analyzes leads, sends commercial proposals.

✓ HR Process

Automates onboarding, processes documents.

✓ Product Management

Develops roadmaps, updates Jira, monitors deadlines.

✓ Project Management

Coordinates teams, organizes meetings, flags risks.

✓ Customer Support

Responds to customer inquiries 24/7.

REAL CASE: AI PRODUCT OWNER IN ACTION

How We Turned Weeks of Chaos into 3 Minutes
of Efficient Magic with AI

Point A

Just six months ago, this is how our process looked:
We'd sign a contract with a client, receive the upfront payment,
and then the routine would begin.

A project manager would get the technical brief and start a familiar cycle:

- creating document templates,
- gathering business requirements,
- breaking everything down into components,
- translating it all into technical tasks,
- Organizing a team brainstorming session,
- Building the timeline and backlog.

WHAT WAS THE PROBLEM?

This process took **2–3 weeks** and required **3–4 specialists**, costing us at least **€1500**. We were losing **precious time and budget** before development even began.

So we asked ourselves **how to automate and speed up this entire process**.

That's how the idea of **AI workers** was born.

// And today, we're showing how it works through the example of our **AI Product Owner**.

HOW DO WE SOLVE IT WITH AN AI WORKER?

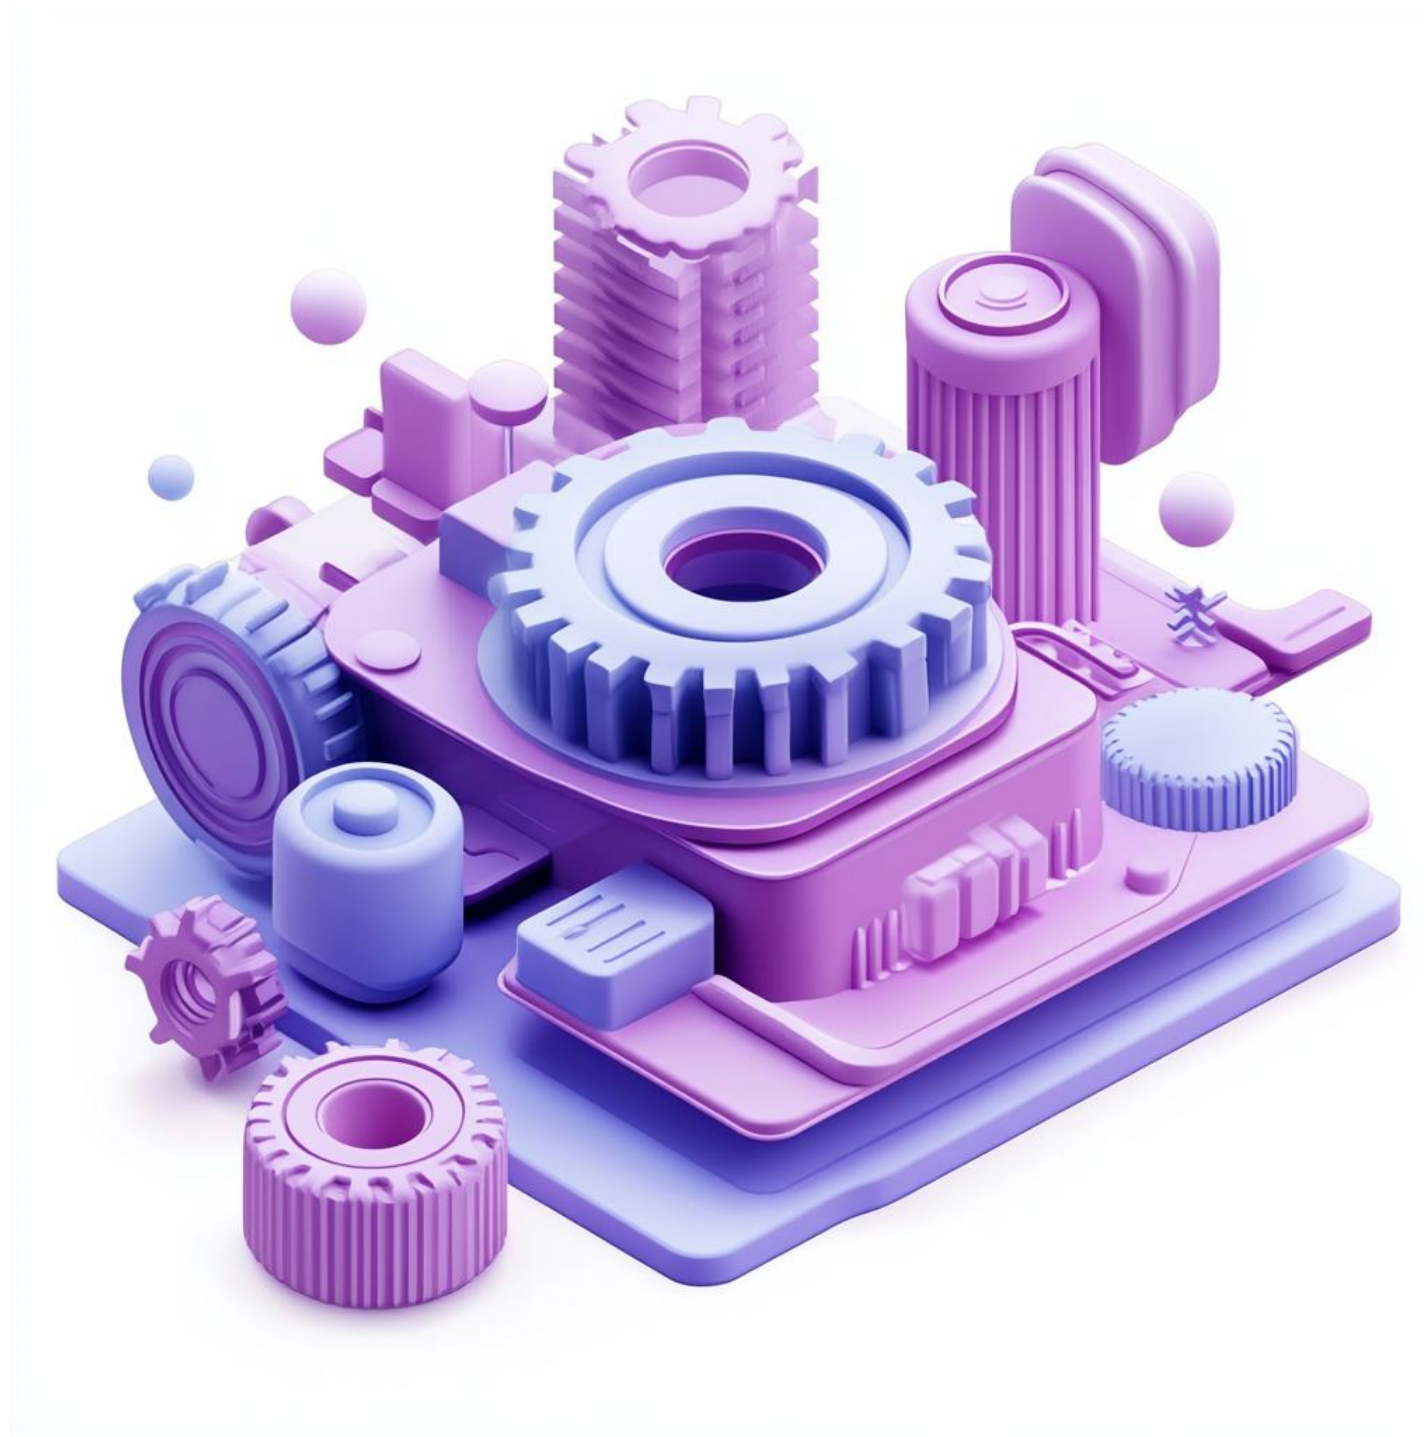

How the AI Product Owner Works:

When a new project is created in our CRM, it automatically triggers an **AI-powered workflow**.

The AI system:

- conducts **business analysis**,
- performs **technical decomposition**,
- generates all necessary documents and tools,
- builds a structured **Jira board**,
- assigns tasks, deadlines, and roles.

WHAT WE ACHIEVED

All of it — autonomously. No human involvement.
The process takes **3–4 minutes** and costs just **€0.30**.

For comparison:
Doing the same manually would take **2–3 weeks**,
require **3–4 professionals**,
and cost **at least €1500**.

The quality? **On par with a senior-level team.**
The dev team can now start working **on the same day**
the contract is signed.

// No more chaos — just clarity and structure from day one.

BEST PRACTICES

AI Lab, Gucci, Web Portal — 15 active projects are already running in this new format with us.

We've cut project kickoff costs by 60%, accelerated the launch process, and freed up valuable resources.

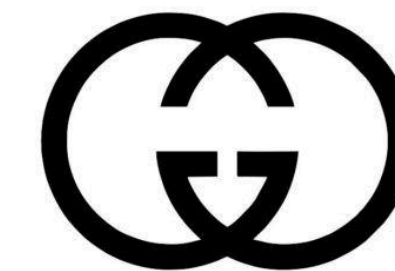

The future is already here — and we're not just living in it but building it.

Together with our **AI Product Owner**, we've already successfully launched **10 internal projects** — fast, precise, and fully autonomous.

And this is only the beginning.

GUCCI

HOW DOES IT WORK?

Our AI Workers are not just plug-and-play tools; they are fully customized to align with your specific business needs. Our process ensures seamless integration and efficiency:

BUSINESS ANALYSIS

We assess your workflows and identify automation opportunities.

AI WORKER DEVELOPMENT

We build and configure your AI Worker to match your operations.

TRAINING & SUPPORT

We provide training and ongoing assistance to ensure smooth deployment.

HOW MUCH DOES IT COST?

14000 €

One-time Setup Fee

Full development and deployment of your custom AI Worker: requirements analysis, system design, training, integration, and implementation.

100 €

Services Subscription

Covers the cost of online services and infrastructure required to ensure stable operation of the AI Worker.

800 €

Monthly Support

Activated after implementation and includes technical support, monitoring, updates, and continuous improvement of your AI Worker.

Why invest?

- ✓ Reduce payroll and HR expenses.
- ✓ Minimize operational inefficiencies.
- ✓ Scale your business effortlessly.
